NEXT GENERATION DIGITAL REPEATER

EMPOWER YOUR OPERATION

Nowadays, different kinds of challenges come to us, whether in public safety, public utilities or commercial industry, we all have a lot of pressure to handle our day to day tasks. For better safety and efficiency throughout your organization, instant communication is one of the most important requirements. To ensure that your voice and data communication can reach everyone and everywhere, Hytera provides the HR1065 series repeater, which represents the next generation digital repeater, to meet your demands for communication coverage and delivering reliable and high-performance radio network services.

Connectivity to more applications

SMOOTH MIGRATION WITH YOUR BUSINESS GROWING

Your communication needs are always growing together with the business expansion. As your business expands your communication needs grow too. As the organisation becomes larger with more employees you will need to upgrade your communication system to increase capacity and ensure continued working efficiency.

The HR1065 series repeaters can be compatible with most Hytera system types: Analog and Digital Conventional modes, XPT, Conventional Simulcast and DMR Tier 3 DS-6211. Whether you want to migrate from analog to digital, or switch to a large capacity trunking system, the HRI 06X series repeaters can be unlocked by firmware upgrade and a chargeable license. Simple, Smooth, and Cost-effective.

* Two Ethernet ports and USB port supported in Enhanced version only.

GENERAL HIGHLIGHTS

Economical 1U Structure

The 1U height of the HR1065 series makes it compact, thus reducing space requirements for installation.

AC/DC Auto Switch

The HR1065 series supports both AC and DC input and AC/DC auto switching.

Wide Coverage

The communication range of HR1065 series is extended with enhanced Rx sensitivity. And the Ethernet port enables access to IP networks, which provides the capability for the HR1065 to connect everyone and everywhere.

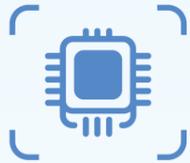

Analog & Digital Auto Switch

The HR1065 series can support mixed channel mode to detect the receiving signal, then automatically switch between analog and digital mode. This offers an easy way to migrate to digital from analog.

ENHANCED VERSION HIGHLIGHTS

The HR1065 series repeater offers standard version and an enhanced version. Both versions support all the general features, while the Enhanced version adopts a built-in co-processor board to enable more advanced features. This offers more options for users to choose according to their actual needs

**The standard version can be easily upgraded to enhanced version with an add-on co-processor module board.*

Outstanding Performance

The enhanced version of HR1065 adopts an add-on quad-core 1.6GHz co-processor and 2G RAM for fast processing speed, which can process the services faster and integrate more applications.

High Integration

The enhanced version of HR1065 is integrated with router and SIP gateway features. Less devices and simplified management. It offers a cost-effective solution for your network construction.

Convenient Management

In the enhanced version a web-based back end platform has been designed to simplify repeater management. Configuration, upgrade and real-time diagnosis can all be completed through a web browser, which is ideal for remote management.

High Security

The enhanced version of HR1065 also adopts SNMP3.0 technology to enhance communication security. All your data is fully protected during the communication.

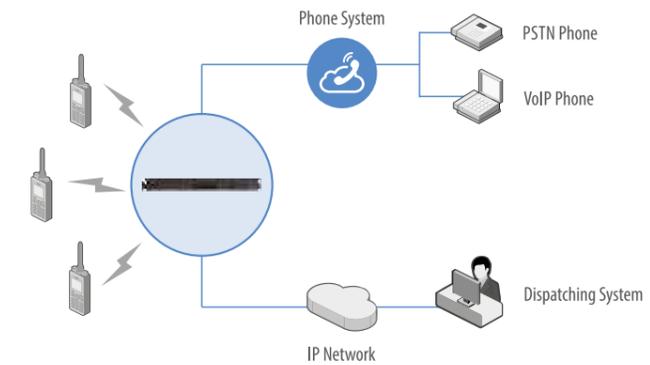

GENERAL SOLUTIONS

Hytera offers a wide range of solutions to enrich functionality for the HR1065 series repeater. Dispatching system, a back-to-back solution for cross-band communication. Additionally the open API of HR1065 can also be provided for third party development to realize customization requirements.

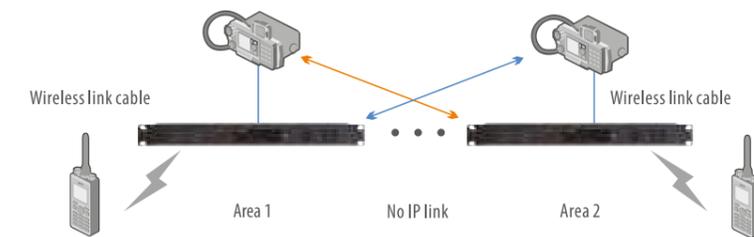

Flexible Interconnection

The HR1065 series repeater is designed as an intelligent communication platform. It is flexible in its ability to connect with a variety of systems to provide seamless communication. Hytera can provide Inter-system Communication connections to SIP Phones and Dispatching systems.

Wireless Link Communication

With the help of Hytera mobile radios MD785i or HM785 it is possible to establish wireless connections between two systems when there is no IP link.
