

SWATCOM4

Voice Amplifier

The SWATCOM 4 is a portable voice amplifier that when attached to a throat mic or lightweight boom mic headset amplifies the user's voice. It allows users to speak at normal levels and be clearly understood while wearing facemasks, PAPR'S (Powered Air Purifying Respirators) and/or protective suits.

SWATCOM4

Voice Amplifier

It is ideal for use in a wide range of applications including those involving mass decontamination. First Responders, Doctors, Nurses and emergency personnel wearing any type of protective mask or hood. In industry SWATCOM 4 can be used to improve person to person communication while wearing protective suits.

The SWATCOM 4 is intrinsically safe approved for hazardous locations and incorporates multiple glands, seals and gaskets within the carbon filled polycarbonate housing so the unit can be washed, decontaminated and withstand heavy use. Standard

features include on/off/volume control knob, visual dual colour power/low battery indicator LED, unique TALKING HEADSETS accessory quick connect, molded in Lanyard attachment point, 360 degree swivel belt clip and Captive battery housing thumbscrews. The SWATCOM 4 is powered by three standard 'AA' batteries and will operate for up to 48 hours. (Batteries and Neck Lanyard included).

Primary Options

*All options connect to the SC4 via a 'Quick Release Cable' allowing for rapid attachment and detachment from the unit.

SWATCOM 4 with Boom Mic

SWATCOM 4 with Throatmic

Technical Specifications

Type of Product:	Voice Amplifier
Type of Microphone:	Interchangeable
Speaker Matyerial:	Mylar
Speaker Frequency Response:	450Hz to 9Hz
Self-Powered:	Yes
Battery Type:	3x 1.5V-AA cells
Battery Life Operation Standby:	40/200
Weight:	13.9oz/393g
Cable Pull Strength:	69kg / 31g
Colours:	Matte Black
Operating Temperature:	-20c to 40c
Output Sound Level Speech:	84dB
Water Resistance:	Yes
Adjustable Mounting:	Yes
ROHS Compliance:	Yes
IP Compliance:	Yes, IP-57
EMC Compliance:	Yes
Warranty:	18 months
Part Number:	SC4
